[About Huber](#)

Innovative equipment and machinery made of stainless steel for municipal and industrial water and wastewater treatment

Competence in stainless steel - Leading in WWT

The HUBER Group is successfully operating in the environmental engineering sector. With its more than 60 subsidiaries, representative offices and agents, the HUBER Group is among the worldwide leading suppliers in the field of wastewater/sludge treatment and process engineering. With more than 175 years of commitment to drinking water and wastewater treatment, HUBER has always been an innovator in this field with a continuous focus on the development of new solutions to conserve one of our most valuable resources: water.

Owned by the family since 1834, the company has developed into a state of the art manufacturer of equipment and solution supplier for all wastewater, production water and drinking water applications. HUBER processes only stainless steel in the production of machines and equipment and is certified by ISO 9001 and ISO 14000.
