

[Home](#) ■ [HUBER Report](#) ■ [Screens](#) ■ [Success in the South West for HUBER Technology](#)

HUBER Technology UK have recently completed the installation of two important projects for South West Water. Both projects featured the replacement of the current inlet screens and screenings handling equipment.

At Luxulyan 2x HUBER Belt Screen EscaMax® with a 6mm perforated plate were installed for a design flow of 225 l/sec along with a HUBER Screenings Wash Press WAP® L screenings handling plant. North Fal STW was a similar installation but with a design flow of 130 l/sec.

These are key projects for HUBER Technology within South West Water which have been followed up with further orders for similar projects.

Key benefits of the HUBER Belt Screen EscaMax® are

- Innovative cleaning system
- Choice of perforation sizes
- Easy to retrofit
- Screenings capture ratio of 84%
- Maintenance free ceramic bearings
- 100+ UK installations

Key benefits of the HUBER Screenings Wash Press WAP® L are;

- Capacity of up to 18m³/h

- Low wash water requirements
- Volume, weight and disposal cost reductions up to 85%
- 400+ UK installations
